Education

B.Sc. in Computer Science & Engineering **GPA: 3.7/4.0**
University of Toledo, Toledo, OH Expected Graduation: December 2027

Experience

Network Engineer Intern | Cenovus Energy, Oregon, OH **September 2026 – Present**

- Collaborated with cross-functional engineering teams to debug connectivity defects and support production deployments.
- Diagnosed performance degradation via root-cause analysis of SolarWinds NPM metrics, resolving issues before production outages.
- Integrated server, VMware virtualized, and backup systems into stable hosting, keeping plant applications highly available.

Process Automation Intern | Cleveland-Cliffs, Coatesville, PA **May 2026 – August 2026**

- Automated ETL pipelines moving live sensor data from legacy OpenVMS Alpha into SQL Server, cutting manual effort by 40%.
- Engineered a threshold-based anomaly detector on live gauge data with real-time email alerts, cutting defective plate escapes 30%.
- Shipped VB.NET journaling microservices via Git/GitHub to a clustered QMS app, restoring PLC-to-SQL data flow in seconds.
- Built SQL views and stored procedures feeding Power BI dashboards, accelerating engineering and business decisions by 50%.

IT Support Technician Level 2 | University of Toledo, Toledo, OH **September 2025 – May 2026**

- Resolved 40+ monthly IT tickets by troubleshooting Windows, hardware, software, and network issues, minimizing downtime.
- Deployed 150+ Windows devices via CLI tools for imaging, BIOS updates, data backups, and software installation.

Undergraduate Research Assistant | University of Toledo, Toledo, OH **May 2025 – December 2025**

- Improved control accuracy by 60% with Python scripts analyzing real-world flight-test data from 15+ hardware trials.
- Reduced navigation error by 40% by tuning a custom PID flight controller in a ROS2-Gazebo digital twin via simulation tests.
- Developed ROS2-Gazebo simulation pipeline to validate PX4 control logic on a digital twin in a physics virtual environment.

Professional Projects

AI Job Application Agent | Claude Code, Python, Agent Skills, Git, GitHub, LaTeX **October 2026 – Present**

- Built a Claude Code agent with custom skills that tailors 4 LaTeX resume tracks to a job post from a single prompt.
- Wrote a Python ATS scorer weighting required (50%), preferred (20%), title and format keyword coverage.
- Automated one-page, one-line and Workday parse checks by compiling with pdflatex and measuring wraps via pdftotext.
- Cut each job application to about 2 minutes by automating resume edits, PDF builds and tracker updates end to end.

SportsSight Analytics | Python, YOLOv8, Roboflow, OpenCV, K-Means, NumPy **August 2025 – December 2025**

- Fine-tuned YOLOv8 on a Roboflow football dataset, achieving 90% player and ball detection accuracy on test video clips.
- Implemented K-Means pixel clustering to assign players to teams by t-shirt color, reaching 75% segmentation accuracy.
- Implemented optical flow and perspective transformation to compute real-world player speed and distance in meters.
- Generated real-time match analytics on ball possession and movement patterns to support data-driven sports insights.

DeepTruth | Python, React, PyTorch, DistilBERT, Gemini API, MongoDB, AWS, GCP **January 2025 – March 2025**

- Won RocketHacks 2025 for a full-stack React and Python AI fact-checking product used by 1,000+ users over 6 months.
- Fine-tuned DistilBERT on 9.5K+ labeled records, enabling dual-model scoring with 70% Gemini and 30% BERT weighting.
- Validated 9,500+ records through a Python ETL pipeline with automated checks, improving data ingestion accuracy.

Technical Skills

Programming Languages & Frameworks: Python, SQL, JavaScript, TypeScript, React, Django, FastAPI, Java, C++

AI Coding & Developer Tools: Claude-Code (plugins, skills, hooks), Cursor, Git, GitHub Actions, Linux CLI, VS Code, Jupyter

Databases & Cloud: PostgreSQL, Supabase, MySQL, MongoDB, AWS (Lambda, S3, EC2), Google Cloud Platform, Docker, Kubernetes

Machine Learning & Vision: Computer Vision, PyTorch, YOLOv8, OpenCV, Fine-Tuning, Model Evaluation, LLM, Hugging Face

Software Development & Data: REST APIs, CI/CD, Code Reviews, Unit Testing, Agile/SCRUM, Data Cleaning, Pandas, NumPy
