# Jay Doshi

Jay.Doshi@rockets.utoledo.edu LinkedIn: jaydoshi1234 GitHub: jaydoshi2 +1 (419) 215-4693

## Education

**B.Sc. in Computer Science & Engineering** **GPA: 3.7/4.0**
University of Toledo, Toledo, Ohio Expected Graduation: December 2027

## Experience

**Network Engineer Intern** | Cenovus Energy, Oregon, OH **September 2026 – December 2026**

- Integrated servers, VMware virtual environments, networking, and backup systems for reliable plant application availability.
- Monitored network and server health in SolarWinds NPM, flagging performance degradation before it escalated into outages.
- Collaborated with infrastructure, OT, and process-control engineers to troubleshoot connectivity and support production cutovers.

**Process Automation Intern** | Cleveland-Cliffs, Coatesville, PA **May 2026 – August 2026**

- Built ETL pipelines pulling live sensor data from legacy OpenVMS Alpha into SQL Server, cutting manual extraction by 40%.
- Engineered real-time email alerts comparing isotope gauge data to plate specs, reducing defective steel plate escapes by 30%.
- Deployed VB.NET microservices to a clustered QMS app, restoring TCP/IP data flow between PLCs and SQL Server in seconds.

**IT Support Technician** | University of Toledo, Toledo, OH **September 2025 – May 2026**

- Resolved 40+ monthly IT tickets by troubleshooting Windows, hardware, software, and network issues, minimizing downtime.
- Imaged and deployed 150+ Windows devices using CLI tools for BIOS updates, data backups, and software installation.
- Managed 200+ IT assets through inventory tracking, device deployment, secure decommissioning, and life-cycle documentation.

**Undergraduate Research Assistant** | University of Toledo, Toledo, OH **May 2025 – December 2025**

- Improved control accuracy by 60% by analyzing telemetry from 15+ hardware trials in Python to isolate link and performance trends.
- Scripted Linux CLI tools for data collection, system configuration, and test logging across hardware and simulation environments.
- Reduced navigation error by 40% by tuning a PID controller in a ROS2-Gazebo digital twin over DDS messaging.

## Professional Projects

**Scalable Load Balancer** | Linux, HAProxy, Virtual Box, Apache, MariaDB, Tailscale, PHP **August 2025 – December 2025**

- Architected a high-availability three-node LAMP stack with HAProxy failover, sustaining 500+ users with zero downtime.
- Automated rsync and database export/restore pipelines, cutting recovery time to under 5 minutes.
- Engineered HAProxy routing and per-IP rate limiting, capping traffic at 200 req/sec while blocking abusive bursts.
- Implemented encrypted Tailscale mesh networking to eliminate public exposure and enforce authenticated node access.

**PulseChat Application** | Docker, AWS EC2, Java Spring Boot, WebSocket, MongoDB **January 2024 – August 2024**

- Containerized the Spring Boot and MongoDB stack with Docker Compose for scalable, reproducible builds and deployments.
- Deployed application on AWS EC2, achieving reliable uptime and public access for live department-wide adoption.
- Developed a real-time messaging platform using Spring Boot and WebSocket (STOMP), serving 300+ university students.

**DeepTruth** | GCP, AWS, Python, PyTorch, DistilBERT, Gemini API, React, MongoDB **January 2025 – March 2025**

- Automated CI/CD deployment via GitHub Actions and GCP VMs, reducing manual release steps and improving consistency.
- Designed AWS Lambda and CloudWatch cron workflows for scheduled Transformer retraining and ML lifecycle management.
- Built Python ETL pipeline with automated validation checks, improving data ingestion accuracy across 9,500+ records.
- Won RocketHacks 2025 for developing a scalable AI fact-checking product used by 1,000+ users over a 6-month period.

## Technical Skills

**Systems, Virtualization & Cloud**: Linux CLI, VMware, Virtual Box, Docker, Kubernetes, AWS (EC2, Lambda, S3, CloudWatch), GCP, Microsoft Azure

**Scripting & Automation**: Bash Scripting, Python, Powershell Scripting, SQL, C++, C, Java, JavaScript, GitHub Actions (CI/CD)

**Networking & Monitoring**: TCP/IP, DNS, DHCP, VLANs, ACLs, NAT, STP, Layer 2/3 Networking, OSI model, Cisco Switching & Routing, SolarWinds NPM

**Databases**: MySQL, PostgreSQL, MariaDB, MongoDB, DynamoDB, AzureDB, Firebase

**Tools & Practices**: Git, WSL, Documentation, Agile/SCRUM, Power BI Dashboards, Pandas, NumPy, Tableau, MATLAB
