Education

B.Sc. in Computer Science & Engineering **GPA: 3.7/4.0**
University of Toledo, Toledo, OH Expected Graduation: December 2027

Experience

Network Engineer Intern | Cenovus Energy, Oregon, OH **September 2026 – Present**

- Diagnosed performance degradation via root-cause analysis of SolarWinds NPM metrics, resolving issues before production outages.
- Debugged cross-domain connectivity defects with cross-functional teams, supporting low-disruption production deployments.
- Integrated server, VMware virtualized, and backup systems into stable hosting, keeping plant applications highly available.

Process Automation Intern | Cleveland-Cliffs, Coatesville, PA **May 2026 – August 2026**

- Shipped VB.NET journaling microservices via Git/GitHub to a clustered QMS app, restoring PLC-to-SQL data flow in seconds.
- Automated ETL pipelines moving live sensor data from legacy OpenVMS Alpha into SQL Server, cutting manual effort by 40%.
- Engineered a threshold-based anomaly detector with real-time defect email alerts, reducing defective plate escapes by 30%.

IT Support Technician Level 2 | University of Toledo, Toledo, OH **September 2025 – May 2026**

- Resolved 40+ monthly IT tickets by troubleshooting Windows, hardware, software, and network issues, minimizing downtime.
- Deployed 150+ Windows devices via CLI tools for imaging, BIOS updates, data backups, and software installation.

Undergraduate Research Assistant | University of Toledo, Toledo, OH **May 2025 – December 2025**

- Reduced navigation error by 40% by tuning a custom PID flight controller in a ROS2-Gazebo digital twin via simulation tests.
- Developed ROS2-Gazebo simulation pipeline to validate PX4 control logic on a digital twin in a physics virtual environment.
- Improved control accuracy by 60% with Python scripts analyzing flight-test data from 15+ hardware trials.

Professional Projects

MCP Chatbot | Model Context Protocol, FastAPI, Ollama, GitHub OAuth, Streamlit **August 2025 – December 2025**

- Built a local LLM chat app on Ollama and the Model Context Protocol (MCP), enabling dynamic tool discovery and tool calls.
- Designed an agentic loop running up to 10 tool-calling iterations per query across 4 MCP tool categories.
- Secured 10 REST endpoints for chat, tool discovery, and monitoring with GitHub OAuth and session management.
- Extended the agent with an optional GitHub MCP server for repository operations and a Streamlit dashboard for model switching.

DeepTruth | Python, GitHub Actions, AWS, GCP, Gemini API, PyTorch, DistilBERT, React, MongoDB **January 2025 – March 2025**

- Automated CI/CD deployment via GitHub Actions workflows to GCP VMs, reducing manual release steps for consistency.
- Designed AWS Lambda and CloudWatch cron workflows for scheduled Transformer retraining and ML lifecycle management.
- Integrated the Gemini API with DistilBERT fine-tuned on 9.5K+ labeled records, enabling dual-model scoring at 70/30 weighting.

PulseChat Application | Docker, AWS EC2, Java Spring Boot, WebSocket, MongoDB **January 2024 – August 2024**

- Containerized Spring Boot and MongoDB services with Docker Compose, producing scalable, reproducible builds and deployments.
- Deployed application on AWS EC2, achieving reliable uptime and public access for live department-wide adoption.
- Engineered real-time messaging platform using Spring Boot and WebSocket (STOMP), serving 300+ university students.

Technical Skills

Programming Languages: Python, Bash Scripting, JavaScript, TypeScript, Java, C++, C, SQL

GenAI & Agentic AI: MCP, LLM, LangChain, Agentic-AI Workflow, RAG, Gemini API, Cursor, Claude-Code (plugins, skills, hooks)

Software Development: REST APIs, CI/CD, Code Reviews, Documentation, Data Structures & Algorithms, Agile/SCRUM, Unit Testing

Cloud & DevOps: AWS (Lambda, S3, EC2, CloudWatch), Microsoft Azure, Google Cloud Platform, Docker, Kubernetes, GitHub Actions

Developer Tools & Databases: Git, GitHub, Linux CLI, Windows PowerShell, VS Code, PostgreSQL, MySQL, MongoDB
