Education

B.Sc. in Computer Science & Engineering **GPA: 3.7/4.0**
University of Toledo, Toledo, OH Expected Graduation: December 2027

Relevant Coursework: Statistics, Kalman Filtering, Database Systems, Operating Systems, Software Engineering

Experience

Network Engineer Intern | Cenovus Energy, Oregon, OH **September 2026 – Present**

- Collaborated with cross-functional engineering teams to validate system integrations and debug connectivity defects.
- Analyzed SolarWinds NPM metrics to perform root-cause analysis, resolving performance issues before production outages.
- Integrated server, VMware virtualized, and backup systems into stable hosting environments supporting plant operations.

Process Controls Intern | Cleveland-Cliffs, Coatesville, PA **May 2026 – August 2026**

- Engineered anomaly detection comparing live gauge data to plate specs with email alerts, cutting defective plate escapes 30%.
- Migrated live sensor data from a legacy OpenVMS system into SQL Server via ETL pipelines, cutting manual effort 40%.
- Increased engineering and business decision efficiency by 50% with Power BI dashboards on SQL views and stored procedures.
- Deployed VB.NET journaling microservices to a clustered QMS app, restoring TCP/IP data flow between PLCs and SQL Server.

IT Support Technician Level 2 | University of Toledo, Toledo, OH **September 2025 – May 2026**

- Resolved 40+ monthly IT tickets by troubleshooting Windows, hardware, software, and network issues, minimizing downtime.
- Managed 200+ IT assets through inventory tracking, device deployment, secure decommissioning, and lifecycle documentation.
- Imaged and deployed 150+ Windows devices using CLI tools for BIOS updates, data backups, and software installation.

Undergraduate Research Assistant | University of Toledo, Toledo, OH **May 2025 – December 2025**

- Developed a ROS2-Gazebo digital twin of the Holybro X500 drone, validating PX4 control logic over MAVLink/UDP.
- Reduced target navigation error by 40% by tuning a custom PID flight controller through simulation-driven testing.
- Improved control accuracy by 60% via Python (Pandas, NumPy) analysis of flight-test data, computing RMSE across 15+ trials.
- Scripted Linux CLI tools for data collection, system configuration, and test logging across hardware and simulation.
- Prototyped PID control designs in MATLAB, trialing gain settings for the PX4 drone flight controller.

Professional Projects

AI Job Application Agent | Python, Claude Code, Agent Skills, LaTeX, Git, GitHub **October 2026 – Present**

- Built a Claude Code agent with custom skills that tailors 4 LaTeX resume tracks to a job post from a single prompt.
- Automated one-page, one-line and Workday parse checks by compiling with pdflatex and measuring wraps via pdftotext.
- Wrote a Python ATS scorer weighting required (50%), preferred (20%), title and format keyword coverage.
- Tracked every application in a Git-versioned CSV with duplicate checks, status updates and 14-day follow-ups.

DeepTruth | Python, React, MongoDB, GCP, AWS, PyTorch, DistilBERT, Gemini API **January 2025 – March 2025**

- Built Python ETL pipeline with automated validation checks, improving data ingestion accuracy across 9,500+ records.
- Automated CI/CD deployment via GitHub Actions and GCP VMs, reducing manual release steps and improving consistency.
- Fine-tuned DistilBERT on 9.5K+ labeled records, enabling dual-model scoring with 70% Gemini and 30% BERT weighting.
- Won RocketHacks 2025 for developing scalable AI fact-checking product used by 1,000+ users over a 6-month period.

SkillBridge Learning Platform | PostgreSQL, Django, NLP, TF-IDF, AWS **August 2024 – December 2024**

- Designed PostgreSQL schemas with dimensional modeling, improving query performance and reporting speed by 80%.
- Implemented JWT and Google OAuth authentication system, securing REST API endpoints and improving integration reliability.
- Developed Gemini API-powered AI agent auto-generating video transcripts and MCQs, reducing manual content effort.
- Reduced response time to under 15 seconds by designing a microservices architecture integrating varied technologies.

Technical Skills

Programming Languages: Python, SQL, JavaScript, Java, C++, C, R

Simulation & Engineering: Digital Twin, ROS2, Gazebo, PX4, MAVLink, QGroundControl, MATLAB, TinkerCAD, Rviz2

Software Development & Testing: REST APIs, CI/CD, Unit Testing, System Design, Agile Methodologies, SCRUM

Data & Visualization: Pandas, NumPy, Matplotlib, Power BI Dashboards, Tableau, Excel (VLOOKUP, PivotTables)

Databases, Cloud & Tools: SQL Server, PostgreSQL, MySQL, MongoDB, AWS, GCP, Git, Linux Command Line, VS Code
