Education

B.Sc. in Computer Science & Engineering **GPA: 3.7/4.0**
University of Toledo, Toledo, OH Expected Graduation: December 2027

Experience

Network Engineer Intern | Cenovus Energy, Oregon, OH **September 2026 – Present**

- Debugged connectivity defects and validated system integrations with cross-functional teams ahead of production deployments.
- Analyzed SolarWinds NPM metrics for root-cause analysis of performance degradation, resolving issues before production outages.

Process Automation Intern | Cleveland-Cliffs, Coatesville, PA **May 2026 – August 2026**

- Automated real-time defect flagging by testing live gauge measurements against plate specs, reducing defective plate escapes by 30%.
- Deployed VB.NET microservices to a clustered QMS app, restoring TCP/IP data flow between PLCs and SQL Server in seconds.
- Built ETL pipelines pulling live sensor data from legacy OpenVMS Alpha into SQL Server, cutting manual extraction by 40%.

IT Support Technician | University of Toledo, Toledo, OH **September 2025 – May 2026**

- Resolved 40+ monthly IT tickets by troubleshooting Windows, hardware, software, and network issues, minimizing downtime.
- Imaged and configured 150+ Windows PCs using CLI tools for BIOS updates, data backups, and software installation.
- Managed 200+ IT assets through inventory tracking, device deployment, secure decommissioning, and life-cycle documentation.

Undergraduate Research Assistant | University of Toledo, Toledo, OH **May 2025 – December 2025**

- Reduced navigation error by 40% by tuning a PID flight controller with simulation-driven testing in a ROS2-Gazebo digital twin.
- Improved control accuracy by 60% with Python scripts analyzing flight-test data from 15+ hardware trials to find failure patterns.
- Scripted Linux CLI tools for data collection, system configuration, and test logging across hardware and simulation environments.

Professional Projects

Scalable Load Balancer | Linux, HAProxy, Apache, MariaDB, PHP, Virtual Box, Tailscale **August 2025 – December 2025**

- Stress-tested a three-node LAMP cluster with HAProxy failover, sustaining 500+ concurrent users with zero downtime.
- Engineered HAProxy routing and per-IP rate limiting, capping traffic at 200 req/sec while blocking abusive bursts.
- Scripted rsync and database export/restore pipelines, cutting recovery time to under 5 minutes.

DeepTruth | Python, GitHub Actions, PyTorch, GCP, AWS, React, MongoDB, DistilBERT **January 2025 – March 2025**

- Built Python ETL pipeline with automated validation checks, improving data ingestion accuracy across 9,500+ records.
- Automated CI/CD deployment via GitHub Actions and GCP VMs, reducing manual release steps and improving consistency.
- Tested the application with 50+ end users after deploying the frontend on AWS Amplify and the backend on a GCP VM.
- Won RocketHacks 2025 for developing scalable AI fact-checking product used by 1,000+ users over a 6-month period.

SkillBridge Learning Platform | Django, PostgreSQL, TF-IDF, NLP, AWS **August 2024 – December 2024**

- Reduced response time to under 15 seconds by designing microservices architecture integrating varied technologies across features.
- Designed PostgreSQL schemas with dimensional modeling, improving query performance and reporting speed by 80%.
- Validated an NLP recommendation engine using TF-IDF and cosine similarity, achieving 95% prediction accuracy in testing.

Technical Skills

Programming & Scripting: Python, C++, C, Java, JavaScript, SQL, VB.NET, Bash Scripting, Powershell Scripting

Software QA & Development: Unit Testing, CI/CD, Code Reviews, Documentation, Agile Methodologies, SCRUM, REST APIs, Data Structures & Algorithms

Operating Systems & Tools: Windows, Linux Command Line, WSL, Windows PowerShell, Git, GitHub Actions, Docker, VMware, Virtual Box

Databases & Reporting: PostgreSQL, MySQL, MongoDB, Power BI Dashboards, Tableau, Excel (VLOOKUP, IF, PivotTables, Charts)

Cloud & Data: AWS (Lambda, S3, EC2), Google Cloud Platform, Pandas, NumPy, Matplotlib, MATLAB
