Education

B.Sc. in Computer Science & Engineering **GPA: 3.7/4.0**
University of Toledo, Toledo, OH Expected Graduation: December 2027

Relevant Coursework: Statistics, Database Systems, Kalman Filtering, Operating Systems, Software Engineering

Experience

Network Engineer Intern | Cenovus Energy, Oregon, OH **September 2026 – Present**

- Diagnosed performance degradation via root-cause analysis of SolarWinds NPM metrics, resolving issues before production outages.
- Collaborated with OT and process-control engineers to troubleshoot cross-domain issues and support production cutovers.
- Monitored network and server health in SolarWinds NPM, flagging production infrastructure degradation early.

Process Controls Intern | Cleveland-Cliffs, Coatesville, PA **May 2026 – August 2026**

- Engineered a classification-based anomaly detection tool analyzing live gauge data, reducing defective steel plate escapes by 30%.
- Developed ETL pipelines collecting live sensor data from legacy OpenVMS Alpha into SQL Server, cutting manual effort 40%.
- Modeled Power BI star schemas on SQL Server views, validating totals against source data to speed decisions by 50%.
- Wrote SQL stored procedures to clean and filter production data in views for downstream Power BI reporting.

IT Support Technician Level 2 | University of Toledo, Toledo, OH **September 2025 – May 2026**

- Resolved 40+ monthly IT tickets by troubleshooting Windows, hardware, software, and network issues, minimizing downtime.
- Deployed 150+ Windows devices via CLI tools for imaging, BIOS updates, data backups, and software installation.

Undergraduate Research Assistant | University of Toledo, Toledo, OH **May 2025 – December 2025**

- Reduced navigation error by 40% by analyzing setpoint and response curves in PX4 Flight Review to tune PID gains.
- Prototyped PID control designs in MATLAB, trialing gain settings for the PX4 drone flight controller.
- Improved control-logic accuracy by 60% by computing RMSE and overshoot across trials with Pandas, NumPy, and Matplotlib.

Professional Projects

SportsSight Analytics | Python, NumPy, Matplotlib, OpenCV, YOLOv8, Tensorflow **August 2025 – December 2025**

- Fine-tuned YOLOv8 on a Roboflow football dataset, achieving 90% player and ball detection accuracy on test video clips.
- Generated real-time match analytics on ball possession and movement patterns to support data-driven sports insights.
- Implemented optical flow and perspective transformation to compute real-world player speed and distance in meters.

DeepTruth-AI | Python, PyTorch, DistilBERT, Gemini API, MongoDB, AWS, GCP, React **January 2025 – March 2025**

- Built Python ETL pipeline with automated validation checks, improving data ingestion accuracy across 9,500+ records.
- Fine-tuned DistilBERT on 9.5K+ labeled records, enabling dual-model scoring with 70% Gemini and 30% BERT weighting.
- Won RocketHacks 2025 for developing a scalable AI fact-checking product that processed data from 1,000+ users over 6 months.

SkillBridge Learning Platform | PostgreSQL, Django, TF-IDF, NLP, AWS **August 2024 – December 2024**

- Designed PostgreSQL schemas with fact and dimensional modeling, improving query performance and reporting speed by 80%.
- Built NLP-based recommendation engine using TF-IDF and cosine similarity, achieving 95% prediction accuracy in testing.
- Developed Gemini API-powered AI agent for auto-generating video transcripts and MCQs, reducing manual content creation effort.

Technical Skills

Programming & Analysis Tools: Python, SQL, MATLAB, Java, R, C++, Excel (VLOOKUP, IF, PivotTables, Charts)

Data Analytics & Visualization: Pandas, NumPy, Matplotlib, Tableau, Power BI Dashboards, Data Cleaning, Data Modeling

Databases & Data Systems: SQL Server, Stored Procedures, ETL Pipelines, PostgreSQL, MySQL, MongoDB, Schema Designing

AI & Machine Learning: Anomaly Detection, Supervised/Unsupervised Learning, Model Evaluation, Computer Vision, NLP

Process Control & Tools: PID Control, Root-Cause Analysis, PLCs, SolarWinds NPM, QGroundControl, Linux Command Line, Git
