Education

B.Sc. in Computer Science & Engineering **GPA: 3.7/4.0**
University of Toledo, Toledo, OH Expected Graduation: December 2027

Experience

Network Engineer Intern | Cenovus Energy, Oregon, OH **September 2026 – Present**

- Analyze SolarWinds NPM metrics for root-cause analysis of performance degradation, resolving issues before production outages.
- Debug connectivity defects and validate system integrations with cross-functional teams ahead of production deployments.

Process Automation Intern | Cleveland-Cliffs, Coatesville, PA **May 2026 – August 2026**

- Deployed VB.NET microservices to a clustered QMS app, restoring TCP/IP data flow between PLCs and SQL Server in seconds.
- Built ETL pipelines pulling live sensor data from legacy OpenVMS Alpha into SQL Server, cutting manual extraction by 40%.
- Automated real-time defect flagging by comparing live gauge data against plate specs, reducing defective plate escapes by 30%.

IT Support Technician Level 2 | University of Toledo, Toledo, OH **September 2025 – May 2026**

- Resolved 40+ monthly IT tickets by troubleshooting Windows, hardware, software, and network issues, minimizing downtime.
- Imaged and deployed 150+ Windows devices using CLI tools for BIOS updates, data backups, and software installation.

Undergraduate Research Assistant | University of Toledo, Toledo, OH **May 2025 – December 2025**

- Improved control accuracy by 60% with Python scripts analyzing flight-test data from 15+ hardware trials to find failure patterns.
- Reduced navigation error by 40% by tuning a PID flight controller with simulation-driven testing in a ROS2-Gazebo digital twin.
- Scripted Linux CLI tools for data collection, system configuration, and test logging across hardware and simulation environments.

Professional Projects

Scalable Load Balancer | HAProxy, Apache, PHP, MariaDB, Tailscale, Virtual Box **August 2025 – December 2025**

- Architected a three-node LAMP network with primary, backup, and HAProxy servers, sustaining 500+ users with zero downtime.
- Engineered HAProxy routing and per-IP rate limiting, capping traffic at 200 req/sec while blocking abusive bursts.
- Scripted rsync and database export/restore pipelines, cutting recovery time to under 5 minutes.
- Implemented encrypted Tailscale mesh networking to eliminate public exposure and enforce authenticated node access.

DeepTruth | Python, React, MongoDB, GCP, AWS, PyTorch, DistilBERT, Gemini API **January 2025 – March 2025**

- Shipped the frontend on AWS Amplify and the backend on a GCP VM, then tested the application with 50+ end users.
- Automated CI/CD deployment via GitHub Actions and GCP VMs, reducing manual release steps and improving consistency.
- Built Python ETL pipeline with automated validation checks, improving data ingestion accuracy across 9,500+ records.
- Won RocketHacks 2025 for developing scalable AI fact-checking product used by 1,000+ users over a 6-month period.

SkillBridge Learning Platform | Django, PostgreSQL, REST APIs, JWT, AWS, NLP **August 2024 – December 2024**

- Designed PostgreSQL schemas with dimensional modeling, improving query performance and reporting speed by 80%.
- Reduced response time to under 15 seconds by designing microservices architecture integrating varied technologies across features.
- Implemented JWT and Google OAuth authentication system, securing REST API endpoints and improving integration reliability.
- Developed Gemini API-powered AI agent for auto-generating video transcripts and MCQs, reducing manual content creation effort.

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, C++, C, R

Software Development: Data Structures & Algorithms, Operating Systems, System Design, REST APIs, Unit Testing, CI/CD, Documentation, Agile/SCRUM

Frameworks & Data Visualization: React, Django, Spring Boot, Power BI Dashboards, Tableau, Excel (PivotTables, Charts), Pandas, NumPy

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Firebase, AWS (Lambda, S3, EC2), Google Cloud Platform

Developer Tools: Git, GitHub Actions, Docker, Linux CLI, VS Code, Jupyter Notebook
