Education

B.Sc. in Computer Science & Engineering **GPA: 3.7/4.0**
University of Toledo, Toledo, OH Expected Graduation: December 2027

Experience

Network Engineer Intern | Cenovus Energy, Oregon, OH **September 2026 – Present**

- Analyze SolarWinds NPM metrics for root-cause analysis of performance degradation, resolving issues before outages.
- Collaborate with cross-functional engineering teams to validate system integrations and debug cross-domain connectivity defects.

Process Automation Intern | Cleveland-Cliffs, Coatesville, PA **May 2026 – August 2026**

- Automated ETL pipelines moving live sensor data from legacy OpenVMS Alpha to SQL Server, cutting manual extraction 40%.
- Engineered VB.NET microservices under Git version control, restoring TCP/IP data flow from PLCs to SQL Server in seconds.
- Built a threshold-based anomaly detection tool flagging defects via real-time email alerts, reducing steel plate escapes by 30%.
- Developed Power BI dashboards on SQL views and stored procedures to monitor production data, accelerating decisions by 50%.

IT Support Technician Level 2 | University of Toledo, Toledo, OH **September 2025 – May 2026**

- Resolved 40+ monthly IT tickets by troubleshooting Windows, hardware, software, and network issues, minimizing downtime.
- Imaged and deployed 150+ Windows devices using CLI tools for BIOS updates, data backups, and software installation.

Undergraduate Research Assistant | University of Toledo, Toledo, OH **May 2025 – December 2025**

- Improved control accuracy by 60% by writing Python scripts to analyze flight-test data from 15+ hardware trials for failure patterns.
- Reduced target navigation error by 40% by implementing and tuning a custom PID flight controller in a ROS2-Gazebo digital twin.

Professional Projects

PolicyRAG Document Intelligence | Python, RAG, FAISS, GPT-4o, FastAPI, Streamlit **December 2025 – January 2026**

- Built a RAG pipeline over 5 insurance policy documents (500+ pages), extracting text and tables from PDFs using pdfplumber.
- Indexed chunks in a FAISS vector store using OpenAI embeddings, reranking by cosine similarity to feed GPT-4o the top 5 clauses.
- Deployed a FastAPI endpoint with token auth answering batched queries in 40–50s; benchmarked retrieval latency and accuracy.

MCP Chatbot | FastAPI, Model Context Protocol, Ollama, Streamlit, GitHub OAuth **August 2025 – December 2025**

- Developed a local LLM chat app integrating Ollama models with Model Context Protocol for dynamic, agentic tool calling.
- Designed an AI agent tool-calling loop of up to 10 iterations per query across 4 MCP tool categories, extensible via GitHub MCP.
- Implemented GitHub OAuth and a Streamlit dashboard exposing 10 REST endpoints for chat, tool discovery, and server monitoring.

DeepTruth | Python, PyTorch, DistilBERT, Gemini API, AWS, GCP, MongoDB, React **January 2025 – March 2025**

- Fine-tuned DistilBERT on 9.5K+ labeled records, enabling dual-model scoring with 70% Gemini and 30% BERT weighting.
- Automated CI/CD deployment via GitHub Actions and GCP VMs, reducing manual release steps and improving consistency.
- Designed AWS Lambda and CloudWatch cron workflows for scheduled Transformer retraining and ML lifecycle management.
- Won RocketHacks 2025 for developing scalable AI fact-checking product used by 1,000+ users over a 6-month period.

Technical Skills

Programming Languages: Python, Java, JavaScript, TypeScript, C++, C, SQL, R

Software Development: Data Structures & Algorithms, REST APIs, Unit Testing, Code Reviews, System Design, CI/CD, Agile/SCRUM

AI & Machine Learning: LLM, RAG, LangChain, MCP, Agentic-AI Workflow, NLP, PyTorch, Transformer Models, Fine-Tuning, Model Evaluation, Hugging Face

Cloud & DevOps: Microsoft Azure, Kubernetes, Docker, AWS (Lambda, S3, EC2), Google Cloud Platform, GitHub Actions

Databases & Tools: PostgreSQL, MongoDB, MySQL, Git, Jupyter Notebook, Power BI Dashboards, Pandas, NumPy, Linux CLI
