Education

B.Sc. in Computer Science & Engineering **GPA: 3.7/4.0**
University of Toledo, Toledo, OH Expected Graduation: December 2027

Experience

Network Engineer Intern | Cenovus Energy, Oregon, OH **September 2026 – Present**

- Collaborate with infrastructure, OT, and process-control engineers to validate system integrations and support production cutovers.
- Monitor network and server health in SolarWinds NPM, flagging performance degradation before it escalates into outages.

Data Processing Engineer Intern | Cleveland-Cliffs, Coatesville, PA **May 2026 – August 2026**

- Built executive-ready Power BI dashboards on SQL Server views and stored procedures, accelerating business decisions by 50%.
- Modeled Power BI table relationships in a star schema and validated report totals against source tables for data accuracy.
- Streamlined data ingestion via ETL pipelines from legacy OpenVMS Alpha into SQL Server, cutting manual extraction 40%.
- Automated real-time defect flagging with email alerts to mill operators, reducing defective steel plate escapes by 30%.

IT Support Technician Level 2 | University of Toledo, Toledo, OH **September 2025 – May 2026**

- Resolved 40+ monthly IT tickets by troubleshooting Windows, hardware, software, and network issues, minimizing downtime.
- Managed 200+ IT assets through inventory tracking, device deployment, secure decommissioning, and life-cycle documentation.

Undergraduate Research Assistant | University of Toledo, Toledo, OH **May 2025 – December 2025**

- Improved control-logic accuracy by 60% by quantifying performance trends with Pandas, NumPy, and Matplotlib across 15+ trials.
- Reduced target navigation error by 40% by analyzing setpoint and response curves in QGroundControl and PX4 Flight Review.

Professional Projects

PolicyRAG Document Intelligence | Python, GPT-4o, RAG, FAISS, FastAPI, Streamlit **December 2025 – January 2026**

- Extracted text and tables from 5 insurance policy PDFs (500+ pages) with pdfplumber to feed a RAG pipeline.
- Indexed chunks in a FAISS vector store using OpenAI embeddings, reranking by cosine similarity to feed GPT-4o the top 5 clauses.
- Deployed a FastAPI endpoint with token auth answering batched queries in 40–50s; benchmarked retrieval latency and accuracy.

DeepTruth-AI | Python, Gemini API, DistilBERT, MongoDB, AWS, GCP, React **January 2025 – March 2025**

- Built Python ETL pipeline with automated validation checks, improving data ingestion accuracy across 9,500+ records.
- Validated the app through user testing with 50+ users after deploying the frontend on AWS Amplify and backend on GCP.
- Fine-tuned DistilBERT on 9.5K+ labeled records, enabling dual-model scoring with 70% Gemini and 30% BERT weighting.
- Won RocketHacks 2025 for developing a scalable AI fact-checking product used by 1,000+ users over a 6-month period.

SkillBridge Learning Platform | PostgreSQL, Django, Gemini API, TF-IDF, NLP, AWS **August 2024 – December 2024**

- Designed PostgreSQL schemas with fact and dimensional modeling, improving query performance and reporting speed by 80%.
- Developed Gemini API-powered AI agent for auto-generating video transcripts and MCQs, reducing manual content creation effort.
- Engineered an NLP recommendation engine using TF-IDF and cosine similarity, achieving 95% prediction accuracy in testing.

Technical Skills

Data Analysis & Visualization: SQL, Power BI Dashboards, Excel (PivotTables, VLOOKUP, Charts), Tableau, Pandas, NumPy, Matplotlib

Methods & Practices: Agile Methodologies, SCRUM, Data Modeling, Data Cleaning, Schema Designing, Documentation

AI & Agentic Tools: Agentic-AI Workflow, LLM, RAG, MCP, LangChain, NLP, Fine-Tuning, Model Evaluation

Databases & Cloud: SQL Server, Microsoft Azure, PostgreSQL, MySQL, MongoDB, AWS (Lambda, S3), Google Cloud Platform

Programming & Tools: Python, SQL, R, Java, JavaScript, C++, Git, Jupyter Notebook, VS Code
